

Weather Watch, Warning, and Advisory Definitions

Weather Advisory—A special weather product to alert an end user of the **occurrence of, or imminent occurrence** of weather conditions impacting operations.

Weather Watch—A special weather product to facilitate resource protection decisions. Weather Watches provide advance notice to designated agencies of the existence of a **potential** for weather conditions of such intensity as to pose a hazard to life or property for which the agency should consider taking protective measures.

Weather Warning—A special weather product to facilitate resource protection decisions. Weather Warnings alert designated agencies to the **imminent or actual occurrence of weather conditions** of such intensity as to pose a hazard to life or property for which the agency must take immediate protective actions.
